

Child Profile Immunization Registry
ENHANCEMENTS & BUG FIXES
Release Notes for Version 5.12.8.1 – November 16, 2012

	AREA OF CHANGE	DESCRIPTION
1	PATIENT DETAIL: DEMOGRAPHICS	Fixed a problem with ownership: on manual entry, when a vaccination was entered without editing the demographic page, ownership was not changing to the new IRMS. That problem is now fixed and ownership moves to the IRMS (Provider) that most recently updated a vaccination record, with or without editing the demographic page.
2	PATIENT DEMOGRAPHIC SCREEN	Guardian names can now be deleted or removed from the Patient Demographic Family Contact section.
3	OVERALL SYSTEM PERFORMANCE	Fixed an issue related to the general performance/run time of the application. The system appears to be more stable now.
4	VACCINATION VIEW/ADD: Adverse Reactions	Additional Adverse reactions added for IPV and Varicella: IPV: Anaphylaxis or anaphylactic shock Any sequela (including death) of events Varicella: Anaphylaxis or anaphylactic shock Encephalopathy (or encephalitis) Pneumonia
5	VACCINATION VIEW/ADD: Adverse Reaction	Fixed an issue where the adverse reaction indicator (#) was not being displayed on the Vaccination View/Add screen.
6	REPORTS: PATIENT RECORD	History of Chicken Pox (Varicella) text has been added to the Vaccination Record Choices: All Recorded Vaccinations (option 2) report when the patient has had Chicken Pox (Varicella) listed as a “History” on the Vaccine View/Add screen.

ENHANCEMENTS & BUG FIXES
Release Notes for Version 5.12.8.1 – November 16, 2012

7	RECONCILIATION & LOT NUMBER MANAGEMENT	When adjusting doses through Reconciliation or Lot Number Search/Add: please note that additional reasons for dose adjustment have been added to the list. Before choosing a new option, please call the Help Desk for advice. More information will be published on the new choices in the near future.
8	REPORTS MODULE: Patient Detail Report	Fixed an issue where the “Public Lot” field was not consistently displaying “N” or “Y” correctly on Patient Detail by Ownership and Patient Detail by Service reports.
9	REPORTS: LOT NUMBER SUMMARY	Fixed an issue where the “Doses Wasted Returned” column on the Lot Number Summary Report did not show the correct value when an adjustment reason was selected in Lot Number Manager of “Unaccounted for in Provider Inventory”.
10	STATE REPORTS: Certificate of Immunization Status (CIS)	MMR and M, M, R vaccine dates will show chronologically on the Certificate of Immunization Status (CIS) form.
11	REMINDER/RECALL	Fixed the ability to schedule the Reminder/Recall report. Also improved the running time of the report when running as a non-scheduled report.
12	FORECAST: INFLUENZA	Influenza forecast for 2012-2013 has been added.
